Summary

I am a detail-oriented, curious and result-driven; skilled front-end developer with over 2 years of experience in building web and mobile applications . My expertise lies in utilizing popular front-end frameworks and libraries such as React Native, React.js, Vue.js, etc to create responsive, feature-rich and scalable interfaces for mobile and web applications. I also have a strong understanding of Node.js which allows me to work on the backend part of web applications and create efficient and scalable servers. Additionally, I have a strong knowledge of object-oriented programming.

Education

BSc
Bowen University

BSc Biological Sciences Oct, 2012 - Sep, 2019
Bowen University, Iwo

SSCE
Albesta Academy

SSCE Sept, 2009 - Jun, 2012
Albesta Academy, Lekki

Work experience

Fullstack Engineer (freelance)   2023-04 - Present
Bankless Consulting

- Utilizing my expertise in Nest.js (Node.js framework), Next.js, Amazon RDS, and other relevant technologies to architect and implement robust endpoints that facilitate seamless data management and tracking.
- Collaborating closely with stakeholders to gather requirements, translating them into actionable technical specifications, and delivering high-quality solutions that meet organizational needs.
- Leveraging Amazon Web Services (AWS) infrastructure, specifically AWS Elastic Beanstalk and AWS S3 bucket, to ensure efficient deployment and scalability of the web application.
- Employing best practices in software development, such as version control, testing, and documentation, to maintain code quality and enable future enhancements.
- Regularly monitoring and optimizing the performance, security, and reliability of the internal tool, ensuring a smooth user experience and adherence to industry standards.

Frontend Developer   2022-06 - Present
Agrify Technologies

- Played a pivotal role in the development and maintenance of the company's marketplace web application, ensuring its efficiency and effectiveness in meeting business objectives.
- Demonstrated proficiency in Next.js framework, utilizing its powerful capabilities to deliver high-performance and scalable web solutions.
- Collaborated closely with cross-functional teams to understand business requirements, translate them into technical specifications, and successfully deliver projects within stringent deadlines.
- Actively participated in code reviews, identifying areas for improvement and implementing best practices to optimize performance, maintainability, and security.

Frontend Developer   2021-11 - 2022-11

UMobile.ng

- Built and maintained the company's website using the latest frontend technologies.
- Built and maintained a modern internal dashboard for the company's product by implementing endpoints & building easy-to-understand user interfaces to track and monitor important user data and real-time key metrics information that are integral in Business Performance Management with React.
- Maintained code and wrote automated tests to ensure the product is of the highest quality.
- Worked in a team that Built pixel-perfect, buttery smooth UIs across both mobile platforms.
- Leveraged native APIs for deep integrations with both platforms.
- Diagnosed and fix bugs and performance bottlenecks for performance that feels native for both ios & andriod apps.

Frontend Engineer Intern   2021-07 - 2021-11
HNGi8

Internship

- A fast paced and challenging internship designed to surface the very best of candidates out of a large pool of participants. It helps people learn how to work in teams, deal with pressure and quickly expand their knowledge.
- Learned to work with the React library, modern CSS frameworks such as Tailwind and some advanced Git concepts.
- Worked in a team alongside other brilliant individuals to build the 'Company Goals' plugin for zuri chat.

Frontend Intern   2021-03 - 2021-07
Zuri

Training

- A 4-month long remote tech training aimed at getting one started in the industry

- It offers collaborative learning, hands-on experience working on real life projects and a great

mentorship opportunity.

- The Frontend path through me through the basics of HTML, CSS, Javascript and React

- During the project phase of the internship, my teammates and I were tasked to build a web application that allows users to send and receive money with no charges. The app also allows users to buy airtime and data from their app wallets. We built reSendapp with HTML5, CSS, Bootstrap, Javascript & Python Django.

Technical skills

HTML

CSS (Tailwind, Bootstrap)

Javascript

React Native

React JS

Node JS

Vue JS

Git

Technical/Creative Writting

Hobbies

Playing video games

Listening to music
